RRP - \$7500  
Now - **\$5500**

Don't forget, we offer free freight with every item on special.

Some items are limited in stock, so be quick. First come, first served.

## Jupiter and Primare, unbelievably realistic sound.

Once in a while comes a system with such dynamics, the hair on the back of your neck stands up. Sound which only live music can deliver. Bass which will rattle the windows and have ornaments vibrating off shelves. The Jupiter is the speaker system which can deliver this performance, once the domain of speakers costing more than \$30,000.

A speaker such as this must be used with only the finest and most transparent electronics. The Primare A32 power amp, and PRE30 pre-amp are some such beasts, with the A32 producing 250wpc @ 8 ohms, 400wpc @ 4 ohms, and a colossal 600wpc into the 2 ohm load of the Jupiter. This kind of power and the high 94dB efficiency of the Jupiter create the kind SPL's small PA systems can only dream of. The PRE30 is a state of the art pre-amp, featuring full balanced dual mono design, 2 x XLR & 5 RCA inputs, 1 XLR & 1 RCA output, home theatre bypass, and full remote control. This spectacular system must be heard to be believed. Mere words can not describe the power and authority this combination can deliver.

For the months of May and June, Equinox is offering the mighty Jupiter for only \$1000 more than the Apogee - **\$13,500**, that's \$3000 off the normal price of \$16,500.

If you choose to mate the Primare A32/PRE30 combination with the Jupiter, the normal RRP is \$27,500, which is already something of a high end bargain.

But take this combination home in May or June, and we'll reduce the price by a further \$1500. The price for the entire system is only **\$23,000**. This is more than 15% or \$4500 off the normal price. Please contact us at [info@equinoxaudio.com.au](mailto:info@equinoxaudio.com.au) for your opportunity to an audition. Taking orders now. For more information of individual items, see - [www.equinoxaudio.com.au](http://www.equinoxaudio.com.au).

## Hints & Tips.

When shopping for new audio equipment, make sure you audition with the same music of your choice all the time. Quite often the sales person will play music which shows the strengths of the system being auditioned. That same system may not perform as well as you'd have hoped with the music you normally listen to.

Ideally, you should audition equipment in your own home for at least 1 week. The stores acoustics will be very different from your own listening room, plus you won't have the stresses of a salesperson leaning over your shoulder. Some of the better dealers will allow home auditions, and of course Equinox allows all\* of it's equipment to be taken home for up to 2 weeks in some cases. 'Til the next time.....
